

Ref. No. DDU/IT/SEMVIII/TRG/2025-2026

Date:- Nov 12, 2025

To,  
Mr. Satyma Raval, Deputy General Manager  
Tech Elecon Pvt. Ltd.,  
Vallabh Vidyanagar - 388120  
Gujarat, India.

Subject: Full-time project training of B.Tech. (IT) semester-VIII student, from 1 December 2025 to 21 March, 2026.

Dear Sir,

We feel happy to introduce ourselves as the Department of Information Technology at D.D. University. The Department of Information Technology was established in 1998. The department offers a Bachelor's degree course in Information Technology. The curriculum of courses is largely comparable to that of IIITs and NITs. Moreover, our curriculum of B.Tech. courses includes subjects that can make students ready to work in industry.

The curriculum includes the following major subjects:

| Computer Hardware                                                                                                                                                                                      | Programming & Data Structures                                                                                                                                                                                                              | Systems & Networking                                                                                                                                                                          | Software Development                                                                                                                                                                                                                                                                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>Computer Peripherals and Interfacing</li> <li>Digital Electronics</li> <li>Microprocessor based System Design</li> <li>Assembly Language Programming</li> </ul> | <ul style="list-style-type: none"> <li>Object Oriented Programming</li> <li>Data and File Structures</li> <li>Design &amp; Analysis of Algorithms</li> <li>Data Mining and Data Warehousing</li> <li>Database Management System</li> </ul> | <ul style="list-style-type: none"> <li>Operating System</li> <li>Computer Network</li> <li>E-commerce and E-security</li> <li>Distributed Computing</li> <li>Knowledge System (AI)</li> </ul> | <ul style="list-style-type: none"> <li>Software Engineering</li> <li>Web Technology (.NET)</li> <li>Java and Advanced Java Technologies (J2EE)</li> <li>Design Patterns and Application-Frameworks (Spring, Hibernate, JS Frameworks)</li> <li>System Design &amp; Practice</li> </ul> |

As a part of their 8<sup>th</sup> semester course curriculum, the students are required to undergo full time project training for an approximate span of four months. Students are expected to go through all the phases (Analysis, Design, Implementation and Testing) of the software development life cycle during the training. *The students have to report to the department every fortnight for internal monitoring and progress report submission, as per university rules.*

We request that you consider our B.Tech. (IT) student(s) named below\* for the industrial training at your organization. We expect a positive response in this matter.

With reference to it, kindly provide the following information about the assigned project to our student(s), if feasible.

Project Title: - \_\_\_\_\_

Project Platform:- \_\_\_\_\_

Role(s) to be assigned to the student:- \_\_\_\_\_

Thanking you,  
Yours faithfully,
